

Criterion E: Evaluation

(110 words)

I asked Ms. Allen to provide feedback on different aspects of the program, I then paraphrased the answers.

- Able to upload data
 - Data uploading feature works
- Able to access data in table form
 - Works, with a few suggestions
 - Table form should have units
 - More resilience when adding/subtracting columns
- Able to analyze data using statistical methods
 - Methods function
 - 5-variable stats are helpful
 - Ability to analyze more than one column per update should be added
- Use of SQL database
 - Accesses SQL database, which means it could be easily altered to work with an online database
- General comments
 - Might actually be used by non-profits
